

Team Standards

September 26, 2025

PROJECT SPONSOR

- ❖ **Chris Ortiz** - Senior Technologist, Tools & Infrastructure
- ❖ **Rex Jackson** - Vice President, Tools & Infrastructure

TEAM DETAILS

- ❖ Team Name: **Blueprint Jacks**
- ❖ Team's Faculty Mentor: **Ogonna Eli**
- ❖ Team Members: **Jackson Belzer, Christian Lamb, Juan José Serrano Mora, Alejandro Benito Marcos**

1. Introduction

The purpose of this document is to provide an overview of team standards and expectations for the P2P2P project. By establishing roles, responsibilities, and communication protocols, this document solidifies how the team will work and contribute to the successful execution of the project. These standards will serve as a foundation for effective teamwork, helping us coordinate efforts, resolve conflicts, and maintain consistent progress throughout the development process.

2. Team Members and Roles

- ❖ Juan José Serrano Mora

Role: Architect and Coder.

Responsibilities: Ensure that core architectural decisions are followed during implementation. Contribute to the backend development.

- ❖ Jackson Belzer

Role: Team Leader, Customer Communicator and Coder.

Responsibilities: Coordinate task assignments, ensure work is progressing, manage meetings, and resolve conflicts when necessary. Coordinate and conduct customer communications. Contribute to both front-end and backend development.

- ❖ Christian Lamb

Role: Recorder and Coder.

Responsibilities: Maintain detailed meeting minutes, document decisions made during meetings, ensure that all action items are clearly recorded and distributed to team members. Contribute to both front-end and backend development.

- ❖ Alejandro Benito Marcos

Role: Release Manager and Coder.

Responsibilities: Coordinate project versioning and branching, review and clean up commit logs to maintain accuracy, readability, and clarity, and ensure that build tools can quickly generate a working release. Contribute to the backend development.

3. Team Meeting Expectations

❖ Meeting times

- Our team meets weekly and in person with our faculty mentor, Ogonna Eli, every Thursday from 5:30 PM to 6:30 PM.
- We also have a weekly online meeting (Microsoft Teams) with our client, SanDisk (Chris Ortiz), on Mondays, from 1:00 PM to 2:00 PM.
- Regarding impromptu meetings, the team has a Discord group where this kind of meetings can be scheduled as needed.
- A Team Self Review meeting will be held once a month, with the date and time agreed upon by all team members at the start of the month.

❖ Agenda Structure

- **Mentor Meetings (5:30 PM - 6:30 PM):**
 - Welcome & Goals (5 min)
 - State objectives.
 - Progress Updates (10 min)
 - Quick member reports.
 - Feedback & Guidance (20 min)
 - Mentor input.
 - Client Feedback (5 min)
 - Review comments.
 - Open Discussion (10 min)
 - General questions and concerns.
 - Next Steps (5 min)
 - Summarize action items.
- **Client Meetings (1:00 PM - 2:00 PM)**
 - Welcome & Goals (5 min)
 - Greet client and set objectives.
 - Project Updates (15 min)
 - Present progress and key results.
 - Feedback (20 min)
 - Gather client input and concerns.
 - Discussion (15 min)
 - Clarify requirements or questions.
 - Next Steps (5 min)
 - Confirm tasks and deadlines.

➤ **Team Self Review**

- Welcome (5 min)
 - Open meeting and explain review process.
- Things I've Done Well (10 min)
 - Members share key achievements.
- Peer Feedback & Impact (10 min)
 - Highlight how team input helped.
- Room for Improvement (10 min)
 - Identify growth areas.
- Improvement Plan (10 min)
 - Share concrete steps for development.
- Other Comments (5 min)
 - Add questions or reflections.
- Open Discussion (5–10 min)
 - Team-wide feedback and exchange.
- Next Steps (5 min)
 - Summarize takeaways and follow-up actions.

❖ **Minutes**

In each meeting, the team will review the progress made during the previous week, outline the tasks to be completed for the current week, and clarify any details regarding deliverables or the website, including communicating this information to the client. Roles will also be assigned, and personal deadlines will be set to ensure that objectives are met.

❖ **Decision-Making Process**

Decisions will be made by a 3/4 majority vote. If consensus is not reached, further discussion will take place or a compromise will be proposed.

❖ **Attendance**

All team members are required to attend meetings in person. If conflicts arise, meetings may be rescheduled or held on Discord. Only tardiness or absences with valid excuses are permitted. The first two unexcused tardies or absences will result in team warnings, and a third occurrence will be reported to the team mentor for further action.

❖ **Conduct**

To address interpersonal conflicts, team divisions, low participation, or frequent design changes, the process will be as follows: team members will first receive a personal heads-up or private conversation. If the same issue occurs three times, a formal meeting will be scheduled to discuss possible solutions or preventive measures. Should the problem persist after multiple discussions, the team will escalate the matter to the team mentor, Ogonna Eli. If no progress is made, the final step will be to hold a team discussion with Ana Paula Chaves.

4. Tools and Document Standards

- ❖ **Word Processing and Presentation:** Google Docs will be used for drafting documents and Google Slides for presentations (Drive), enabling seamless team collaboration. GitHub will remain the platform for managing and sharing code, and additional tools may be introduced as needed to support specific tasks and maintain high-quality work.
- ❖ **Version Control:** GitHub will serve as the primary platform for sharing, maintaining, and managing the codebase. All commits must be approved by the Release Manager, and any forks with updated code must be communicated to the entire team.
- ❖ **Issue Tracking:** Issues will be tracked using GitHub's built-in issue tracker, where they can be assigned and labeled throughout the process. In addition, we will use the weekly tracker through Google Sheets that is provided by our mentor, which will be used to monitor short-term progress.
- ❖ **Composition and Review:** One or two lead editors, depending on the size of the deliverables, will review all deliverables to ensure consistency and accuracy. Deliverables must be completed 24 hours before the final deadline to allow time for editor feedback and revisions.

5. Team Self Review

Each month, every team member will complete a self-review using a shared template in Google Drive that includes the following sections:

- ❖ **Things I've Done Well:** Highlights my achievements and successes this month.
- ❖ **Peer Feedback and Impact:** Notes moments when teammate feedback helped me grow and improve the product.
- ❖ **Room for Improvement:** Identifies areas where I can enhance my skills or performance.
- ❖ **Improvement Plan:** Outlines specific actions I will take to improve in those areas.
- ❖ **Other Comments:** Any additional thoughts, questions, or observations I want to share.

During a scheduled review meeting, each member will present their self-assessment and receive constructive feedback from the team.
